

# Table of Contents

## Section A. Introduction

Provides a brief background of the settlement and the purpose of the First National Stakeholder Forum.

### Frequently Asked Questions . . . . . A - 1

Provides background on the DOE PEIS Settlement Agreement and the purpose of the forum in a question and answer format.

## Section B. Progress to Date

Provides a brief explanation of DOE accomplishments to date.

### Project Status . . . . . B - 1

Provides a time line of major activities completed to date.

## Section C. Data Sources

Provides an overview of DOE's specific and relevant data sources and identifies the PEIS Settlement data requirements that each data source satisfies.

### Data Sources . . . . . C - 1

Provides an introduction to the currently available or planned DOE data sources that are potential sources of information for the Central Internet Database.

## Section D. Data by Category

Provides a detailed discussion of each major category of data that will be included in the Central Internet Database.

### Introduction . . . . . D - 1

Provides an overview of the major data categories requested by the settlement agreement that will be included in the Central Internet Database.

### High-Level Waste . . . . . D - 3

Provides information on the definition of high-level waste, describes the types of data available, identifies the data source, and presents sample data.

### Spent Nuclear Fuel . . . . . D - 7

Provides information on the definition of spent nuclear fuel, describes the types of data available, identifies the data source, and presents sample data.

### Transuranic Waste . . . . . D - 10

Provides information on the definition of transuranic waste, describes the types of data available, identifies the data source, and presents sample data.

### **Low-Level and Mixed Low-Level Waste . . . . . D - 14**

Provides information on the definitions of low-level and mixed low-level waste, describes the types of data available, identifies the data source, and presents sample data.

### **Contaminated Media . . . . . D - 18**

Provides information on the definition of contaminated media, describes the types of data available, identifies the data source, and presents sample data.

### **Facilities . . . . . D - 21**

Provides information on the definition of facilities, describes the types of data available, identifies the data source, and presents sample data.

### **Materials in Inventory . . . . . D - 24**

Provides information on the definition of materials in inventory, describes the types of data available, identifies the data source, and presents sample data.

### **Non-Radioactive Hazardous Waste and Toxic Chemicals . . . . . D - 27**

Provides information on the definitions of non-radioactive hazardous waste and toxic chemicals, describes the types of data available, identifies the data source, and presents sample data.

## **Section E. User Interface Topics**

Presents key discussion topics to determine how the Central Internet Database will operate.

### **Overview . . . . . E - 1**

Provides an overview of Internet technology and its influence on user interface topics.

### **User Interface . . . . . E - 3**

Presents background information to facilitate discussion on website presentation.

### **Report and Query . . . . . E - 8**

Presents background information to facilitate discussion on report, search, and query options (including some on-line examples) and outlines some key questions that will help frame forum discussion.

### **Accessibility . . . . . E - 14**

Presents background information to facilitate discussion on the electronic accessibility of the Central Internet Database and the hard-copy distribution to users who lack computer access.

## **Section F. Proposed Future Project Activities**

Provides information and a proposed schedule for upcoming project milestones and opportunities for on-going stakeholder involvement.

### **Proposed Major Project Activities and Milestones . . . . . F - 1**

Provides a proposed schedule of major project milestones which are critical to the successful implementation of the Central Internet Database.

## **Section G. Data Integration and Linkages**

Provides information on databases and web sites which will potentially be linked to the Central Internet Database.

### **Data Integration and Linkages . . . . . G - 1**

Provides a list of preliminary data sources that will be integrated into the Central Internet Database; and databases, reports, and tables that will be linked to the Central Internet Database.

## **Section H. Acronym List**

Provides full name descriptions of frequently used acronyms.

### **Acronym List . . . . . H - 1**

Provides acronyms and full name descriptions of acronyms used in this report.
